

Arely Rosendes

Software Engineer (Frontend / Full-Stack)

San Francisco CA | (510) 326 - 0896 | arelyrosendes@gmail.com

www.linkedin.com/in/arelyrosendes | <https://github.com/arelyrosendes> | arelyrosendes.com

SUMMARY

Frontend-focused Software Engineer with experience delivering polished, production-ready web applications and AI-powered tools. Strong in React, TypeScript, UI architecture, REST APIs, Firebase, and cloud deployment workflows.

EDUCATION

University of California, Santa Cruz

September 2024 - June 2026

B.S. in Computer Science

Relevant Courses: Machine Learning, Computer Systems and C Programming, Computer Architecture, Algorithm Analysis, Computer System Design, Software Engineering

Ohlone College

August 2021 - June 2024

A.S. in Computer Science | A.S. in Mathematics

EXPERIENCE

Software Engineer / Web Developer, Baskin Engineering UCSC

June 2025 - Present

- Designed, built, and maintain a TypeScript booking platform used by prospective students to schedule engineering tours.
- Automated a previously manual tour scheduling workflow by building a production booking system integrated with Firebase and Google Calendar.
- Developed a role-based admin dashboard for managing tours, staff assignments, schedules, and office hours.
- Integrated Firebase Authentication and Firestore for secure user management and real-time data updates.

DevOps Intern, Lawrence Livermore National Laboratory (LLNL)

June 2024 - August 2024

- Built an AI-powered document Q&A web interface using Python, Gradio, and PaperQA, enabling users to upload files and receive accurate, cited responses.
- Designed and implemented conversation persistence to store and retrieve user interactions.
- Deployed applications using Docker, OpenShift, and GitLab CI/CD pipelines.
- Integrated OAuth-based authentication via OAuth Proxy for secure internal access.
- Collaborated in a Linux-based environment following version control and deployment best practices.

SOFTWARE PROJECTS

ChariWork: Charity Donation Website (React/Java)

- Co-developed a full-stack web application enabling users to link bank accounts and donate spare change via transactions.
- Implemented Plaid OAuth authentication and secure token exchange for bank account integration.
- Built a transaction processing pipeline to calculate micro-donations and trigger automated donation events.
- Integrated the Every.org REST API to dynamically fetch charities and execute donation workflows.
- Designed secure API communication and session handling for sensitive financial data.

Carbon Footprint Calculator & Quiz Program (C++)

- Developed a calculator and quiz application to estimate carbon footprints based on user responses.
- Utilized hash tables, maps, and binary trees to store questions, process responses, and dynamically traverse quiz logic.
- Reinforced core concepts in data structures, algorithms, and object-oriented programming.

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python, C/C++, Java, TypeScript, JavaScript, Bash, MIPS Assembly

Frontend: React, HTML, CSS, Tailwind/MUI

Backend & Databases: Firebase, Neon (PostgreSQL), REST APIs

DevOps & Cloud: AWS, Docker, Kubernetes, OpenShift, CI/CD (GitHub/GitLab), OpenAPI

Tools: Git, GitLab, Linux, VS Code

Certifications: AWS Certified Cloud Practitioner
